

John Garner III

Junior Software Engineer

WORK EXPERIENCE

IT Support – Nephron Pharmaceuticals

- Managed Printer inventory.
- Called off-site 3rd parties such as Pollock when Printers went down.
- Worked with IT team on ticketing system with tasks such as fixing laptops, changing passwords etc.
- Tested different technology such as Linux, Virtualization Software, etc.

PROJECTS

GTC CAPSTONE

- <https://github.com/TheJavaCoder/Capstone>
- Used C# to develop an idler game for iOS similar to games such as [Melvor Idle](#).
- Worked with the team to implement WPF as the GUI for the Front-End.
- Leveraged knowledge of Java & Python to write interfaces to manage backup log data
- Documented processes of the code for ease of other developers.

STEVE THE DISCORD BOT

- <https://github.com/JohnGarnerIII/Steve-the-Discord-Bot>
- Implemented a fully functional Discord Bot named Steve.
- Used Python and the Discord API to implement ways to post images, play text games and remove users.
- Maintained codebase on GitHub.
